

MULTI^M HEATWEED

CAPACITY | 3000-4500 m²/day

THE HEATWEED® METHOD

100% Hot water
Power and flow optimized

Environmentally friendly
Non-chemical weed control

Heatweed Active Temperature Regulation
Highly accurate temperature

STANDARD SPECIFICATIONS

Capacity: 3000-4500 m², up to 34 hectares/season
Water consumption for weed control: Up to 17 L
Temperature for weed control: 98-99,6 °C
Automatic temperature regulation (ATR): Yes
Pressure for cleaning: Up to 250 bar
Temperature for cleaning: Approx. 75 °C
Capacity of water tank: 450 L
Fuel for operation/engine: Diesel
Number of burners: 1
Fuel for burner: Diesel / Aspen Biodiesel
Capacity of tank for burner: 85 L
Noise level: Below 85 dB measured 1 m from machine
Measurements (l x w x h): 3500 x 1750 x 1600 mm
Weight: 1050 kg

STANDARD ACCESSORIES:

- 2 x stainless steel hose reels
- 2 x 25 m high pressure hoses 3/8" with heat protection
- 2x stainless steel 20 cm weed lances with 20 cm
- One stainless steel weed lance 30 cm with wheels
- One high-pressure cleaning lance

FOR TWO OPERATORS, BUILT-IN-TRAILER

Heatweed Multi M is an environmentally friendly moss and weed killer in a trailer that can also serve as a high pressure cleaner. Using the hot water technique effectively controls weeds and moss without the use of pesticides. With the low pressure function the trailer ensures a constant water temperature of 99 °C at the lance.

Heatweed Multi M is constructed in such a way that two people can use it at the same time, but works just as well with only one operator. The machine is low-noise (< 85 db) thanks to the practical assembly of motor and operating compartment, while the option of working with a closed guard means it can also be used in residential areas.

A WEED MACHINE AND HIGH-PRESSURE WASHER COMBINED

Heatweed Multi M is a highly efficient and professional cleaning solution. With pressure up to 250 bar, 21 liter water per minute and temperature at approximately 75 °C dirt and grease dissolves quickly - without the use of chemicals. This makes the Heatweed Multi M an extremely versatile and practical machine.
